

Geography

Year 7

- Unit 1 - Making Geographical Decisions
- Unit 2 - River Landscapes
- Unit 3 - A Biodiverse World
- Unit 4 - A Changing Climate
- Unit 5 - Urban Environments

Year 8

- Unit 1 - Population Change
- Unit 2 - Coastal Landscapes
- Unit 3 - Tectonic Hazards

Year 9

- Unit 1 - Africa
- Unit 2 - Europe
- Unit 3 - The Middle East
- Unit 4 - Asia
- Unit 5 - North America

GCSE AQA - 8035

Year 10

- Unit 1 - Tectonic Hazards
- Unit 2 - Urban Issues and Challenges
- Unit 3 - River Landscapes in the UK
- Unit 4 - The Challenge of Resource Management
- Unit 5 - Weather Hazards and Climate Change
- Human & Physical Fieldwork

Year 11

- Unit 1 - The Living World
- Unit 2 - Coastal Landscapes in the UK
- Unit 3 - The Changing Economic World
- Pre-Release

A-Level AQA - 7037

Year 12

Hazards: Causes, impacts and management of tectonic, atmospheric and hydrological hazards. Human vulnerability and response strategies influence risk.

Changing Places: How places are experienced and represented, exploring relationships between people and place at different scales through social, cultural and economic lenses.

Water and Carbon Cycles: The physical and human influences on the cycles, their interdependence and role in regulating Earth's systems & contributing to climate change.

Year 13

Resource Security: The global distribution, supply and demand of energy, water and minerals. The geopolitical, environmental and technological factors influencing their future security.

Global Governance: How institutions, organisations and agreements attempt to manage global issues. Tensions between sovereignty and global cooperation.

Water and Carbon Cycles: The physical and human influences on the cycles, their interdependence and role in regulating Earth's systems & contributing to climate change.
