

YEAR 12

PRODUCT DESIGN

Summer work 2018

Task 1 - You have been given the task of identifying eight products. You need to select four products which you would put in the **HALL OF FAME**, for what ever reason you feel these are excellent examples of well designed and/or manufactured products. Think before you decided. Would you happily look at those same four products every day of your life? Time and time again would you still pick them as excellent examples of design?

Now select four products for the **HALL OF SHAME**, what products do you think should never have been produced, they don't function, they look ghastly, you would hate to have to look at them or use them every day of your life.

You need to have your work ready to present to the Product Design group at the start of your first lesson in September.

Task 2 - You have been given the task of producing a detailed analysis of a product of your choice. You must consider function, suitability of materials and manufacturing processes used, ergonomic suitability, aesthetics, target audience, associated marketing and advertising and cost.

Presenting your investigation - You need to produce a minimum of one sheet of A4 along with a 1-minute presentation outlining your investigation. **You need to have your work ready to present to the Product Design group in your first lesson in September.**
